

ABDULLAH RAZA

FULL-STACK DEVELOPER · ERP & BUSINESS SOFTWARE

I build software that moves business forward.

React · Python · PostgreSQL · REST APIs · Business Automation

BSCS, University of Central Punjab · Lahore, Pakistan

PROFILE

I’m Abdullah Raza, a BSCS student at the University of Central Punjab and a developer interested in full-stack applications, ERP systems, and business automation. I enjoy understanding how businesses work and translating their processes into practical software. From React interfaces to Python backends, relational databases, and deployment, I connect the different parts of a software product into one working solution.

CORE CAPABILITIES

FRONTEND	React, JavaScript, HTML, CSS
BACKEND	Python, Flask, Django, REST APIs
DATABASES	PostgreSQL, SQL, relational data modelling
BUSINESS SOFTWARE	ERP systems, business logic, workflow automation, API integration
DEPLOYMENT	Git, GitHub, Vercel, Render, environment configuration

SERVICES

Full-stack web applications	React frontend development
Python Flask and Django backends	PostgreSQL and SQL database design
Business management systems	ERP modules and workflows
REST API development and integration	Deployment, debugging and support

SELECTED WORK

Five live production projects spanning business platforms, digital experiences, ERP and construction applications.

01

CONSTRUCTION / BUSINESS PLATFORM

A2ZTameer

A construction-sector business platform presenting services and connecting clients with construction work online.

Role: Developer — implementation and deployment

Stack: Web development · Responsive UI · Deployment

<https://a2ztameer.com/>

02

CHEF WEBSITE / DIGITAL EXPERIENCE

Dumpukht Cuisine Pakistan

A culinary brand website presenting a chef's work, cuisine and contact points as a single digital experience.

Role: Developer — implementation and deployment

Stack: Web development · Responsive UI · Deployment

<https://dumpukhtcuisinepakistan.com/>

03

DIGITAL SOLUTIONS

SmartSols

A digital solutions company website covering services, positioning and client enquiry paths.

Role: Developer — implementation and deployment

Stack: Web development · Responsive UI · Deployment

<https://smartsols.org/>

04

ERP / BUSINESS SOFTWARE

SoftERPs

An ERP and business-software product site covering business modules such as sales, inventory, finance and HR.

Role: Developer — implementation and deployment
Stack: Web development · ERP domain · Deployment

<https://softerps.com/>

05

CONSTRUCTION MANAGEMENT APPLICATION

Younas Contracting

A construction management application covering contracting work, deployed on Vercel.

Role: Developer — application build and deployment
Stack: React · Vercel · Responsive UI
